اسم المشروع: Phishing Awareness Campaign

اسم الفريق CyberAnonymous :

أحمد الحداد - عبدالله المدحوس - عبدالله الصخابه - عيسى الهيدوس - أحمد العبدالله

الحل

- Not trusting any suspicious email or link.
- We created a presentation to raise awareness about the dangers of phishing.
- Making more awareness campaigns for Phishing, because phishing depends on the users knowledge.
- Make sure that all emails and links you click are trusted by using tools.

المنهجية

- Work was divided between members and we worked at home using voice call.
- We searched in the web and found information.
- The presentation was split into parts for each member.
- Searched for available online Phishing tools.

التحدي

- A lot of requirements in a short time, but we used time management..
- We didn't know what to write, so we asked our teachers for help.
- We weren't confident in presenting the project.
- Difficulty in creating a Phishing Simulation.
