

PASSWORD MANAGER

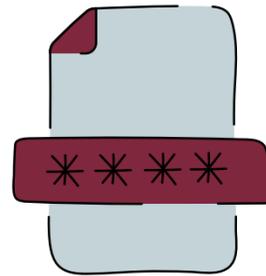

BY: Cybervault

Abdulla, Mohammed, Mohammed, Yousef, Naif, Essa

THE PROBLEM

- Forgetting passwords
- Storing passwords insecurely
- Overwhelming number of accounts
- Time and hassle

METHODOLOGY

Front-end:

- HTML for structure
- CSS for styling
- Javascript for interactivity

Back-end:

- Django (python)
- SQLite3 is used for the database

THE SOLUTION

We created a password manager that securely stores all your passwords in one safe place, simplifying how you manage and access your credentials. Some of the benefits are:

- Encrypted Storage
- Cross-Platform Compatability
- User-Friendly Interface
