المنهجية Methodology

Method 1: we disguised our link as a famous URL like YouTube

Method 2: we changed our email design to make it look like it came from a legitimate source and fit the victims likeliness.

التحدي Problem

As the phishing group we found it hard to lie and gather information about the person as some people have extra security like a private account and a lot of people don't get tricked by random links easily. Furthermore, spam filters keep blocking our phishing attempt.
